

BH Doors and Engineering Limited is a customer focused company within the door service industry

We specialise in the installation, repair and maintenance of the following:

- *Automatic Doors*
- *Manual Doors*
- *Fire Doors and Fire Escapes*
- *Movable Walls*

All work carried out to British Standard 7036, Document M and DDA Legislation

We understand that if your doors fail, it is a major problem and causes inconvenience. With over 15 years' experience within the door service industry we have set up our company to provide you with a personal service.

Preventative maintenance is the key to increasing long term reliability and reducing overall costs. We would be pleased to arrange a visit to your site to provide a quotation for this service and produce an Asset Register to ensure that all door closing equipment is detailed and subsequently monitored during the contract.

Our specific service schedules are for each type of door detailing the schedule of works carried out. This ensures that you, the customer, is aware of all necessary work and costs prior to any maintenance visit. Risk Assessments and Method Statements are included.

All maintenance visits are arranged with the customer for the most convenient time and date prior to the month of visit.

To discuss your requirements
