AN INTRODUCTION TO
ALUMINIUM
DOORS

BH Doors and Engineering can provide an extensive range of aluminium doors and aluminium shopfronts whether manual or automatic.

Aluminium Doors can be cut and shaped to fit virtually any configuration of your design requirements, such as:

- **New build construction**
- **Retrofitting**
- **Refurbishment**
- **Adaption for Accessibility**

Manual Aluminium Doors Benefits

- Single or in Pairs
- Inward, outward or double action opening
- Internal or external installation
- Key or electronic locking
- Single, double or un-glazed
- Door(s) only or as part of a entrance system
- Can be powder coated to any colour
- It is also possible to have different colours of doors to the frame to assist visually impaired people

Aluminium Door Safety Feature

The frame of the door is curved at the pivot point to eliminate any trapping risk.

This is known as an anti-finger trap style.

Aluminium Door Installation

A polyester finish is baked onto the aluminium profiles to create a high quality, robust and durable finish, which can withstand all the rigours of UK weather conditions.

Each bespoke RAL colour option is available in a gloss or matt finish. There are 213 colours available as every door system is bespoke in size and colour.

After Care Support

BH Doors provide service and maintenance to ensure the continued operation and compliance of your installation.

We have a specific schedule of works for servicing which includes inspection and minor repairs.

Our checklists form part of the current legislation and provide you with documentation per door for your records.

We also provide service contract agreements on all manufacturers equipment regardless of who it was installed by.
